## Glimpse of Cancer Exhibition

Most of the people have fear about cancer. However; the reality is very different. It is important to know that every cancer is not fatal! Advancement in medicine and technology has made early detection possible. Newer treatment modalities have improved survivorship. Now, we can say that CANCER is not always CANCEL any more.

This exhibition will provide in depth information to a common person as well as it will be helpful to remove myths associated with cancer. This exhibition is prepared and reviewed by experts of respective subjects in cancer.

This exhibition is created with an objective of spreading cancer related information widely. We request the visitors to have benefit of this exhibition and to share this information with other people.

## The exhibition will provide following information

- General Information about Cancer
- Diagnosis and Treatment
- Cancers of Different Organs
- Common Cancers in Women
- Breast Cancer
- Common Cancers in Children
- Palliative Care
- Cancer Prevention
- Tobacco and Cancer
- Healthy Lifestyle
